

10/521716

DT01 Rec'd PCT/PTO 19 JAN 2005

In the Claims:

- 1.(original) A fragrance cartridge comprising a reservoir containing a fragrance material and provided with channels to permit ingress of carrier gas into the reservoir and egress of fragrance-containing carrier gas from the reservoir, the channels being defined by capillaries having internal diameter and length dimensions sufficient to act as closure means to prevent, or substantially prevent, leakage of fragrance from the reservoir into a head space external of the cartridge when carrier gas flow is interrupted.
- 2.(original) A cartridge according to claim 1 wherein the capillaries independently have a diameter of 0.1 to 0.4mm.
- 3.(currently amended) A cartridge according to claim 1 ~~or claim 2~~ wherein the capillaries independently have a length of 20 to 30mm.
- 4.(original) A fragrance containing cartridge according to claim 1 wherein fragrance leakage does not exceed a rate of 400ng per second.
- 5.(currently amended) A support body having embedded therein a cartridge or cartridges according to claim 1 ~~as defined in any of the preceding claims.~~
- 6.(original) A support body according to claim 5 comprising a substantially flat body in the shape of a credit card.
- 7.(currently amended) A support body according to claim 7 ~~or claim 8~~ having on an outer surface a machine-readable microprocessor chip containing instructions to be read by a device regarding actuation of gas flow through the cartridge or cartridges in a time-dependent and sequential manner, optionally relaying signals

from audio or visual apparatus thereby to synchronise the presentation of odours with an audio and/or visual display.

8.(currently amended)        A device containing pump means for expelling carrier gas adapted to receive a cartridge, cartridges, or support body containing cartridge or cartridges according to claim 1 ~~as defined in any of the preceding claims~~.

9.(currently amended)        A method of enhancing the sensorial perception of a viewer, listener or consumer of an audio and/or visual performance or presentation comprising the step of passing carrier gas through a cartridge, support body or device according to claim 1 ~~as defined in any of the preceding claims~~, thereby to present fragrances into a head space local to the listener, viewer or consumer.
